Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102 and 35 USC § 103

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 2, 4-10, 12-19 and 21-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Carney et al. (US006408278B1).
4. Carney et al. teaches (independent claims 1, 9 and 18) a method, system and computer program product for providing targeted advertising to a group of individuals, the method comprising the steps of: collecting group data from wireless communication devices present in an advertising area (col. 6 lines 49-56 and col. 7 lines 3-5); selecting advertisements based on the collected group data and displaying the selected advertisements on an electronic display device located in the advertising area to provide targeted advertising (col. 1 lines 45-61).
5. Carney et al. also teaches at the citations given above claims 2, 4-7, 10, 12-14, 19 and 21-23.
6. Carney et al. also teaches: claim 8 (col. 5 lines 57-65); claim 15 (col. 3 lines 55-67 and col. 4 lines 10-12, where *server computer 20* is the remote data collector and advertisement selector); and claims 16 and 17 (col. 4 lines 23-29).

Art Unit: 3622

7. Claims 3, 11 and 20 are rejected under 35 U.S.C. 103(a) as being obvious over Carney et al.
8. Carney et al. does not teach Bluetooth technology. Because Bluetooth technology was a well-known means at the time of the invention for facilitating communication among wireless devices, it would have been obvious to one of ordinary skill in the art, at the time of the invention, to add Bluetooth technology to the teachings of Carney et al.

Conclusion

9. The references made of record and not relied upon are considered pertinent to applicant's disclosure. Lu et al. (US005550928A) teaches the use of active tags to gather audience demographic information. Matsumori (US006179206B1) teaches an RFID card used to gather customer proximity information.
